

12th September 2023

Dear Parents/Carers,

Our science department have recently signed up to an online platform called SENECA Learning.

SENECA offers free online GCSE and KS3 science courses which have been written by examiners and industry experts. It also allows parents to create a parent account to track your child's progress.

The science department will be using this to support students learning by setting assignments for students to complete at home to reinforce the curriculum that we deliver during lessons. The software has a cycle of learning, quiz, learning, quiz and depending on the results from the quiz will redirect students to some more learning, if necessary, before moving on.

Student login details are as follows:

Email: students school email address

Password: Seneca_2022!

We advise that all students reset their password on entry to the system to ensure safety for all students.

I would like all students to have logged in by the **20th September** after which we will be begin setting homework via SENECA. The homework link will be sent out on TEAMS as well as students making a note of it in their homework planners.

Please can you support your student with logging in and if there are any issues to come and see myself, Mrs. Adams, or Mr. Bond.

Any questions then please email me at aadams@johnferneley.org

Kind regards,

Abi Adams
Head of Science
